

SDSA Displacement Probability Sensitivity Analysis

p went from 0.0005 to 0.005 (8 values × 10,000 simulations × 4 configurations)

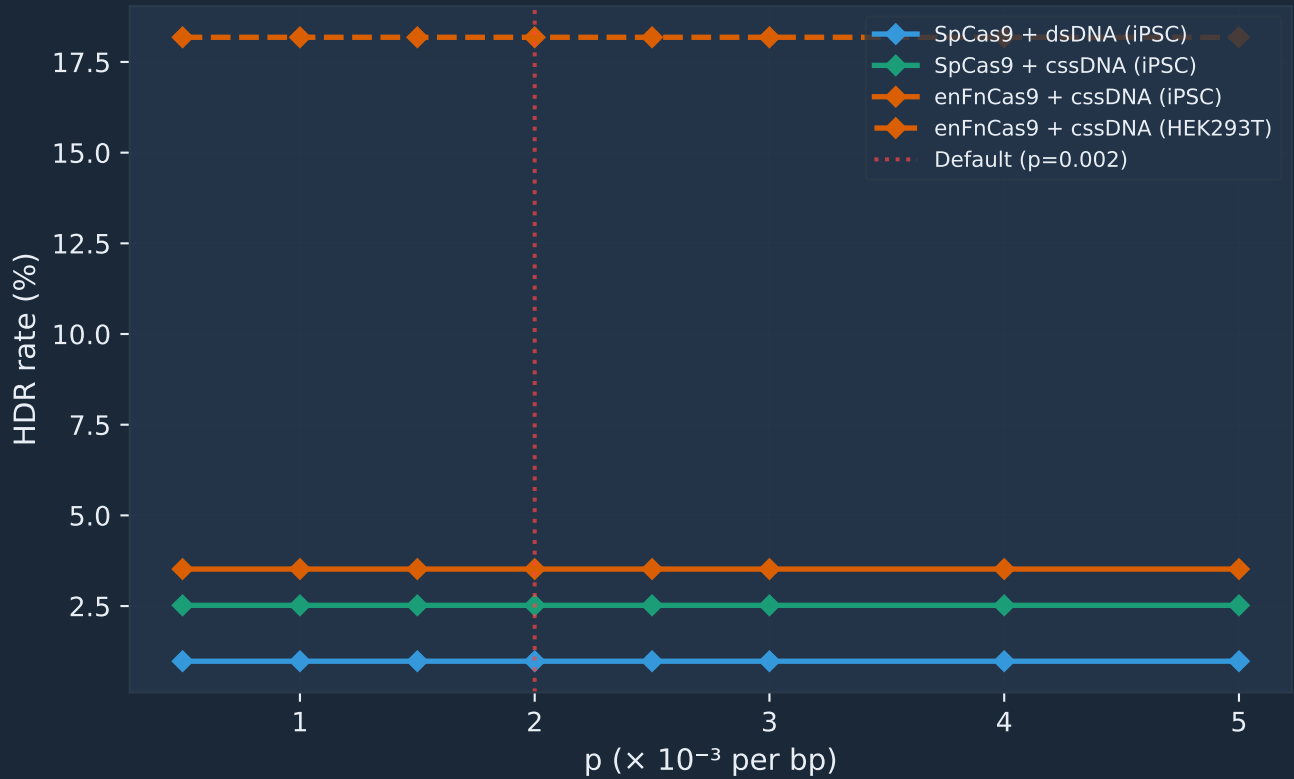

A. Mean Tract Length vs. p

B. Distance Probabilities (enFnCas9 + cssDNA (iPSC))

C. HDR Rate vs. p

ROBUSTNESS SUMMARY

Parameter: SDSA displacement prob.
Range: 0.0005 – 0.005
(10-fold range)

Default (p=0.002):
Mean tract: 706 bp
HDR rate: 3.5%
P(≥500bp): 47.2%

Across full range:
Tract: 282 – 2358 bp
HDR: 3.5% – 3.5%

Conclusion: HDR remains
FEASIBLE across full range.
Recommendations are ROBUST.
